Amendments to the Specification:

On page 5, at line 2, please add the following:

Figure 3 is an exploded view of a reel for packaging having corrugated side walls.

On page 5, the paragraph beginning at line 4, should be amended to read as follows:

The reel package of the present invention comprises opposing sidewalls **2,4** or flanges formed of the specified or appropriate substrate. The sidewalls **2,4** or flanges may be formed of paper, styrofoam, wood or other suitable material. **Figure 1.** The sidewalls **2,4** or flanges may be formed of corrugated material, including corrugated paper. **Figure 3.** The sidewalls are connected by a core **6** formed of polyurethane. The core is formed or molded by preparing a partition, which may be a ring **8**. The ring may be made of paper or other suitable material, which is filled with a flowable material **10**, and acts as a mold, and forms the flowable material.
